

Correction to A Streamlined Process for the Conversion of Artemisinin to Artemether

Rodger W. Stringham and David S. Teager*

Org. Process Res. Dev. **2012**, *16*, 764–768; 10.1021/op300037e

β -Artemether

The structure for β -artemether is shown above, with the correct stereochemistry shown at the anomeric (8a) position. Assignments are correct for the α - and β -anomers of artemether and dihydroartemisinin as discussed in the text; only the structure drawings are in error.
