

Correction to Diarylheptanoids from *Dioscorea villosa* (Wild Yam)[†]

Shi-Hui Dong, Dejan Nikolić, Charlotte Simmler, Feng Qiu, Richard B. van Breemen, Djaja D. Soejarto, Guido F. Pauli, and Shao-Nong Chen*

J. Nat. Prod. **2012**, *75*, 2168–2177, 10.1021/np300603z

The study failed to notice that the use of MTPA-Cl as derivatization agent leads to a reversal of the *R/S* designation of the configuration of the resulting (*R*)- and (*S*)-MTPA derivatives, as a result of a change in CIP priorities at the chiral carbon. Accordingly, the absolute configurations of compounds **1–9** should be reversed and assigned as their enantiomers: (1*R*,3*R*,5*S*,6*E*)-1,7-bis(4-hydroxyphenyl)-1,5-epoxy-3-hydroxyhept-6-ene (**1**), (1*R*,3*R*,5*R*)-1,7-bis(4-hydroxy-

phenyl)-1,5-epoxy-3-hydroxyheptane (**2**), (1*S*,3*S*,5*S*)-1,7-bis(4-hydroxyphenyl)-1,5-epoxy-3-hydroxyheptane (**3**), (1*R*,3*S*,5*R*)-1,7-bis(4-hydroxyphenyl)-1,5-epoxy-3-hydroxyheptane (**4**), (1*S*,3*R*,5*S*)-1,7-bis(4-hydroxyphenyl)-1,5-epoxy-3-hydroxyheptane (**5**), (5*S*,1*E*)-1,7-bis(4-hydroxyphenyl)-5-hydroxyhept-1-en-3-one (**6**), (5*R*,1*E*)-1,7-bis(4-hydroxyphenyl)-5-hydroxyhept-1-en-3-one (**7**), (5*R*)-1,7-bis(4-hydroxyphenyl)-5-hydroxyheptan-3-one (**8**), and (5*S*)-1,7-bis(4-hydroxyphenyl)-5-hydroxyheptan-
