

Additions and Corrections

2007, Volume 26

Smaranda C. Marinescu, Theodor Agapie, Michael W. Day, and John E. Bercaw*: Group 3 Dialkyl Complexes with Tetradentate (L, L, N, O; L = N, O, S) Monoanionic Ligands: Synthesis and Reactivity.

Page 1178. While the focus of our recent paper was group 3 alkyl complexes not featuring a cyclopentadienyl ligand, reference should have been made in the first paragraph of the Introduction to some olefin polymerization catalysts based on monocyclopentadienyl group 3 alkyl cations,^{1–5} reported by Hou and co-workers.
