

## Correction to Thermal versus Photochemical Reductive Elimination of Aryl Chlorides from NHC-Gold Complexes

Michael J. Ghidui, Allen J. Pistner, Glenn P. A. Yap, Daniel A. Lutterman, and Joel Rosenthal\*

*Organometallics*, **2013**, 32 (18), 5026–5029. DOI: 10.1021/om400701f

In our article we reported the synthesis, electronic structure, and photoreactivity of the complex  $[(\text{IPr})\text{Au}^{\text{III}}(\text{Cl})_2\text{C}_6\text{F}_5]$ . We recently found that the synthesis and crystal structure of this complex had been reported earlier this year.<sup>1</sup> In the interest of scientific and scholarly rigor, we wish to bring the reader's attention to this earlier work. This addition does not alter the results, discussion, or conclusions described in our publication.
