

Additions & Corrections

Some Items of Interest to Process R&D Chemists and Engineers

Trevor Laird,* Stephen A. Hermitage, and Ulf Tilstam
(*Org. Process Res. Dev.* **2003**, 7, 124–134).

In the section entitled, Role of Nucleation Inhibition in Resolutions with Families of Resolving Agents, on page 133, line 10, the author's name should be Nieuwenhuijzen. We regret this unfortunate error.
