

Cycloquest: Identification of Cyclopeptides via Database Search of Their Mass Spectra against Genome Databases

Hosein Mohimani, Wei-Ting Liu, Joshua S. Mylne, Aaron G. Poth, Michelle L. Colgrave, Dat Tran, Michael E. Selsted, Pieter C. Dorrestein, and Pavel A. Pevzner*

Journal of Proteome Research **2010**, *10*, 4505–4512. Doi:10.1021/pr200323a

Page 4505. In the Introduction paragraph, the following words were presented as capitalized and should be lowercase: circulin, kalata, cyclosporin, and circulins.

Page 4507. In the **Sodium Borohydride Treatment of SKF** section, “incubated at 50” should read “incubated at 50 °C”. In the **Cycloquest Algorithm** section “this is 2-fold” should be “this is two-fold”.

Page 4510. In the **False Discovery Rate of Cyloquest** section (starts on 4509), *Shewanella* should be *Shewanella*.

Page 4511. Under Associated Content, the Acknowledgment section was missing. It should read: Acknowledgements. This work was supported by US National Institutes of Health grants 1-P41-RR024851-01 and GM086283, and Australian Research Council grant DP0984390. J.M. is an ARC Queen Elizabeth II Fellow (DP0879133) and The John S. Mattick Fellow.

Page 4512. The title in reference 36 was incorrect. The proper title is: Albumins and their processing machinery are hijacked for cyclic peptides in sunflower.
