

Correction to NCN-Pincer Metal Complexes (Ti, Cr, V, Zr, Hf, and Nb) of the Phebox Ligand (*S,S*)-2,6-Bis(4'-isopropyl-2'-oxazolinyl)phenyl

Alexey V. Chuchuryukin, Rubin Huang, Martin Lutz, John C. Chadwick, Ernst E. van Faassen, Anthony L. Spek, and Gerard van Koten*

2011, 30(10), 2819–2830. DOI:10.1021/om200170b

The author list for this paper should appear as it does in this Addition and Correction. The affiliation for E.E.v.F. is as follows: Condensed Matter and Interfaces, Faculty of Science, Utrecht University, Padualaan 8, 3584 CH Utrecht, The Netherlands.

The Acknowledgment should read as shown below.

■ ACKNOWLEDGMENTS

This research was supported in part (A.V.C., R.H.) by the Dutch Polymer Institute (DPI), projects 106 and 495, and (A.L.S.) by the Council for Chemical Sciences of The Netherlands Organisation for Scientific Research (CW-NWO). Prof. Dr. B. Hessen and Dr. G. P. M. van Klink are kindly acknowledged for their suggestions and stimulating discussion. O. Staal and Dr. W. P. Kretschmer and the COP-Center (RU Groningen) are kindly acknowledged for providing the opportunity and help during the homogeneous olefin polymerization experiments.
