

Proteomic Analysis of Nuclei Isolated from Cancer Cell Lines Treated with Indenoisoquinoline NSC 724998, a Novel Topoisomerase I Inhibitor [*Journal of Proteome Research* J. Proteome Res. **2010**, *9*, 4016–4027. DOI: 10.1021/pr100194d]. Bingnan Han, Luke H. Stockwin, Chad Hancock, Sherry X. Yu, Melinda G. Hollingshead, and Dianne L. Newton*

The structure of NSC 724998 originally shown in Figure 1A is missing a nitrogen atom in the isoquinoline ring. The correct structure is shown below.
