Chem. Res. Toxicol. **2009**, 22, 734–741. DOI: 10.0121/tx800479s

Due to an error in which standard curve values from a previous study were accidentally and inappropriately applied to the present one, some values in Table 2 are incorrect. To obtain the correct values, multiply all MHBMA levels by 0.5, DHBMA levels by 2.5, HBMA levels by 5.0, and HEMA levels by 0.5. The conclusions of the article remain the same.
