

Additions and Corrections

2005, Volume 24

Ludovic Vieille-Petit, Georg Süss-Fink,* Bruno Therrien, Thomas R. Ward, Helen Stöckli-Evans, Gaël Labat, Lydia Karmazin-Brelot, Antonia Neels, Thomas Bürgi, Richard G. Finke, and Collin M. Hagen: Synthesis and Characterization of Tetrahedral Ru₃O Clusters with Intrinsic Framework Chirality: A Chiral Probe of the Intact Cluster Catalysis Concept

Page 6112. In the published version of this article, Figure 9 is missing; erroneously, Figure 11 was reproduced two times instead. The correct Figure 9 should be as it is shown here.

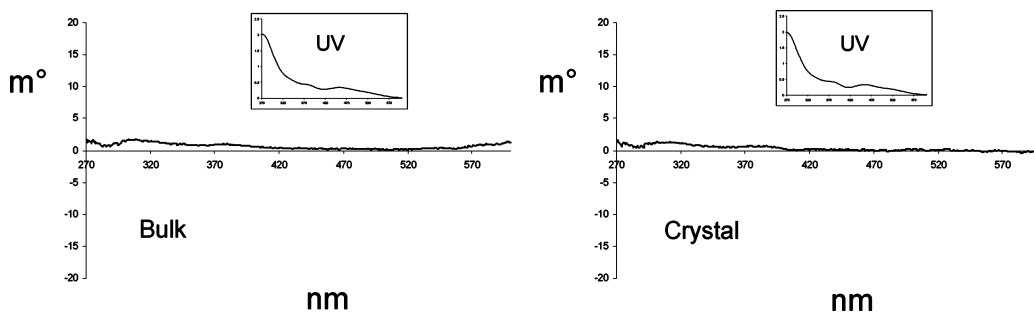

Figure 9. CD spectra (in MeOH) of [16][PF₆] (bulk) and of the single crystal of [16][PF₆] used for X-ray structure analysis. Both spectra display the same weak absorption bands. The corresponding UV spectra are shown in the frame.
