

Correction to Potent Antifouling Resorcylic Acid Lactones from the Gorgonian-Derived Fungus *Cochliobolus lunatus*

Chang-Lun Shao, Hui-Xian Wu, Chang-Yun Wang,* Qing-Ai Liu, Ying Xu, Mei-Yan Wei, Pei-Yuan Qian, Yu-Cheng Gu, Cai-Juan Zheng, Zhi-Gang She,* and Yong-Cheng Lin

J. Nat. Prod. **2011**, 74 (4), 629–633, 10.1021/np100641b

Pages 629 and 630: Structures for cochliomycin C (3) and paecilomycin F (7) should be corrected as shown:

Other changes corresponding to this correction are as follows:

Page 631: In the third paragraph of the left column, “the configuration of cochliomycin C (3) should be assigned as 4′S,5′R,6′R,10′S” should be changed to “the configuration of cochliomycin C (3) should be assigned as 4′S,5′R,6′S,10′S”.

The error was caused by the configuration of paecilomycin F (7), which was first assigned as 4′S,5′R,6′R,10′S¹ and later was corrected as 4′S,5′R,6′S,10′S by Liangxiong Xu et al.² We apologize for any inconvenience caused by this error.
