

**Humoral Immunity Directed against Tumor-Associated Antigens As Potential Biomarkers for the Early Diagnosis of Cancer** *J. Proteome Res.* **2008**, *7*, 1388–1394. Hailing Lu,\* Vivian Goodell, and Mary L. Disis

On the eighth line in the paragraph below Figure 2, the statement “Response rates to single antigens in this population ranged from 3% to 34%, but response rates for healthy controls were not reported.” should be changed to “Response rates to single antigens in this population ranged from 3% to 34%, and response rates in healthy controls ranged from 2% to 9%.” We apologize for the error in citing the reference by Chapman et al.
