

Correction to Synthesis and Characterization of Paramagnetic Lanthanide Benzyl Complexes

Wenliang Huang, Brianna M. Upton, Saeed I. Khan, and Paula L. Diaconescu*

Organometallics **2013**, *32*, 1379–1386.10.1021/om3010433

The claim made in our original paper that $\text{ErBn}_3(\text{THF})_2$ and $\text{GdBn}_3(\text{THF})_3$ are the first structurally characterized Er and Gd trisalkyl complexes not incorporating N-chelating ligands was inaccurate. Liddle et al. have prepared $\text{GdBn}_3(\text{THF})_3$ and $\text{ErBn}_3(\text{THF})_3$ using different starting materials, $\text{GdI}_3(\text{THF})_{3.5}$ and $\text{ErI}_3(\text{THF})_{3.5}$, as reported in ref 1.
