2007, Volume 26

Yasushi Nishihara,* Mitsuru Miyasaka, Yoshiaki Inoue, Tomoka Yamaguchi, Masaaki Kojima, and Kentaro Takagi: Preparation, Structures, and Thermal Reactivity of Alkoxy carbonyl(cyano)palladium(II) Complexes *trans*-Pd(CO-OR)(CN)(PPh₃)₂ (R = Me, Et, ⁿPr, ⁱPr, ⁿBu, ^tBu, and Bn) as Intermediates of the Palladium-Catalyzed Cyanoesterification of Norbornene Derivatives

Page 4054. In this paper, we described the activation of carbon–carbon σ -bonds promoted by transition metal complexes. Recently, however, carbon–carbon bond cleavage on Fe(II) compounds was reported by Nakazawa et al.,¹ and these papers should have been cited in our report. We regret the oversight.
